UV-C DISINFECTION PRODUCTS

OUR PRODUCTS ARE 99.99% EFFECTIVE IN DISINFECTING HUNDREDS OF PATHOGENS INCLUDING VIRUSES, BACTERIA AND MOLD

Why UVSheltron?

We are the leader in providing non-toxic solutions for cleaning and disinfection. Through the integration of new technology-enabled services and systems.

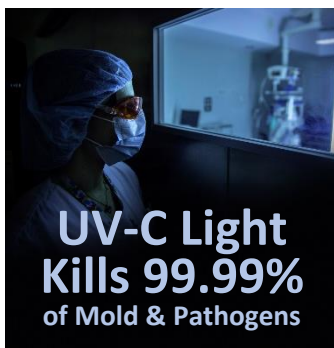

Ultraviolet (UV-C) disinfection has become an incredibly reliable and viable alternative to chemical disinfection methods. This is due to the increased awareness of chemical-resistant microbes and the presence of harmful by-products.

UVSheltron destroys viruses and stops the spread of infections.

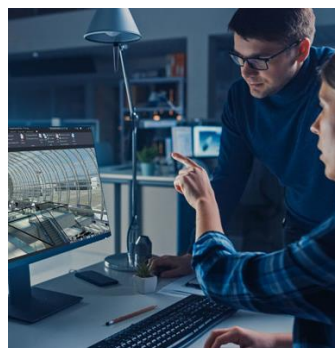

Disinfection Cleaning Services

- Trained in International Sanitary Supply Association (ISSA) and Cleaning Management Institute (CMI) processes
- Trained for recommended monitoring and inspection procedures, proper labeling, dilution, personal protective equipment (PPE), restocking supplies in appropriate storage procedures

**UV-C Light
Kills 99.99%
of Mold & Pathogens**

COVID-19 Disinfection & Decontamination

- Trained staff disinfects and decontaminates per current CDC COVID-19 guidelines
- Front-line custodians provide Healthy High-Performance Cleaning (HHPC), inhibiting the spread of communicable diseases while transferring individuals
- Utilize Biosafety PPE (masks, face shield and gown)

Pure Air 500 & 200

Portable aerosol disinfection devices. These UV devices are hospital grade air sanitizers that can run 24/7 to destroy viruses, bacteria, mold spores & allergens and eliminate odors. The Photo Catalytic Oxidation (PCO) renders live airborne substances inactive and therefore harmless without creating any hazardous waste like ozone or hydrogen peroxide.

Covers
4,000 sq ft

Covers
1,200 sq ft

Elide

Designed for small object disinfection. Used to effectively disinfect masks, PPE, face shields, goggles, jewelry, watches, smartphones, tablets, badges, eyeglasses, and workstation equipment quickly and safely.

Ark

Used to effectively disinfect wheelchairs, small and large portable equipment. Can be placed in airports, schools, military facilities, households, or any open space.

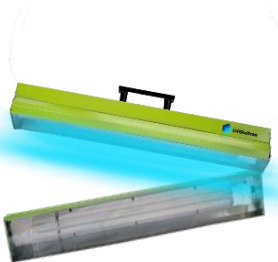

Illuminant 6 & 3

(Differentiated by the tower heights, 3ft/6ft)
 Designed for space disinfection of areas up to 9,000 square feet. An effective environmentally friendly, chemical-free and area decontamination apparatus that can be used in hospitals, airports, offices, schools, senior living facilities, households, or any space requiring disinfection. Device is equipped with motion detectors that automatically turn the unit off to prevent unsafe exposure.

Irrupt 2 & Irrupt NT

Handhelds designed for targeted disinfection of small workspaces and personal protective equipment (PPE). Quickly and safely decontaminates electronic devices, cars, buses, airplanes, and other transportation means where space is tight.

Sheltron PB (Protective Barrier)

Designed for separating workstations for an extra margin of safety without obstructing the view between individuals. This freestanding plexiglass barrier is available in custom sizing and designed to fit your needs. With quality and safety in mind, built for stability and 4 casters for easy mobility. Can be used for offices, retail, and educational environments. Equipment is made with a lifetime warranty.

Chamber

Designed for medium to large object disinfection. Use to effectively disinfect large tools, first responder gear, personal protective equipment (PPE), sports equipment, lab coats, and electronic devices. Can be placed in schools, military facilities, households, or any open space.
